### Introduction

Bus Stop Whores is a reality site with a sexy twist. The crew heads out to the local bus stop looking for young ladies who are in need of a ride. When they find chicks desperate enough to accept a ride, they take her back to a cheap motel and ride her ass all night! In the morning she is back at the curb waiting for the bus but at least she has money for the trip. The downside to the site is that it no longer updates. However it does give you access to lots of other sites on the network that update often.

### Adult Review

A quality site with some interesting reality based content, Bus Stop Whores brings you the action straight from the nation's dirtiest bus stops and cheapest motels. With 43 exclusive scenes filmed in 480x360 and 1000s of pictures to back up each update, it's a site that delivers on what it promises. Skanky sluts sucking and fucking for bus money!

The bad thing about the site is that it has not updated since August of 2007 and seems to no longer be in the update schedule on the network. The good news is, your membership also gets you access to dozens of other sites with 100s of hours of exclusive content and most of the sites update every week.... which means your dick gets access to new action on a daily basis!

With a \$4.95 3 day limited trial you may be tempted to try to save a few bucks, but just like the buses these whores ride... you get only what you pay for! Signup for the full access monthly membership and get all the movies and sites instead of limited access.

### Porn Summary

Young sexy teens who need to get from point A to point B but do not have a car are often forced to ride the bus. Bus stops can be dirty unsafe places. A nice hot meal and a place to stay is often all it takes to talk these girls out of their pants for a night of cheap motel sex. Best of all, in the morning when you are done with them... these whores all have a bus to catch - after they clean up of course!

### Review Rating

The Tongue says '*Site no longer updates but it is part of a huge active network*'
