### Introduction

This is a site crammed full of oral action. Little women gulping down a face deforming length of man-meat as it tries to dislocate their jaws and knock out their teeth. Can they calm the beast before it destroys them?

### Adult Review

This site is more like a horror movie than it is like most other adult web content. Each scene features a monster cock that would best be accompanied by the theme from JAWS as it found its way out into the open... before being plunged head first down the gullet of the scene's awaiting starlet.

True to its name, the content is all oral and all truly Big with a capital "B"... most of the meat on this site looks more like a limb than a sexual organ... and these women can't wait to put their mouths and throats to the challenge.

This site is offered up by a production house that made its name originally as a DVD distributor of fine filth. The content is excellent, the videos are offered in a variety of formats and this is all original and exclusive smut you won't find elsewhere. Many of the actresses are fresh faces which is always a plus and the action is solid from start to finish.

The only knocks against the site come from the fact that these guys are DVD makers changing over to the digital market and they have not yet worked out the technical kinks as well as they work out the on screen kinkys.

The interface is a bit simple looking and lacks some functionality you'd expect from a top line site. Also, the text work that comes with each clip is more like what you read on a DVD back cover and less informative than you might hope for from a website.

Worst of all, the broadband versions of the videos are chopped into 8-15 segments in most cases and require you to sit and download each... one at a time with no option to get a whole scene from a single click.

As another sign they are a DVD company in transition they also do not offer any kind of trial membership at this time. Their content is well worth the full month price but with no trial available you'll have to take TheTongue's word for it.

Even with those negatives the site still stands up rather well against the competition... and will have your cock standing up rather well also. Given some time to finish their transition from boxed discs to web work this site will become even better.

Aside from this site your membership gets you access to all the HushPass sites which are listed on the right side of this page. That is a ton of content and almost every second of it is well worth watching!

### Porn Summary

To be honest, this is not a "throating" site because the cocks featured are simply too big to get down any girl's throat. Hell most of these chicks can't even get their lips closed around them.
